EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, line 1, after "This is a divisional of Application No. 09/660,417 filed September 12, 2000," please insert --now U.S. Patent 6,702,896 B1,--

2. The following is an examiner's statement of reasons for allowance: With regard to claims 1-3, the instant invention is deemed to be a non-obvious modification the admitted prior art (Figure 7). The improvement comprises the steps utilizing the components of various known power supply devices (such as those disclosed in the Admitted prior art) with the step of using green compact electrode, formed of compressed powder as a discharge electrode, adjacent to a workpiece, in order to improve power supplies to the green compact electrode in order to improve coating discharge. Saito (US 6,086,684) does disclose the concept of using a green compact electrode, but without the requisite power source or the discharge voltage and detection voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
